

## Semi-automatic Double Wire Binding Machine

### OBWJ520 OBWC520—For large quantities of book and calendars binding !

1. High binding output;
2. Automatic double wire inserting, cutting and closing;
3. For easy and precise binding of double wire from the spool in variable length from 8 to 61 loops, and available up to five sub-binding;
4. Comfortable change of diameters due to exchangeable closing bars ( optionally available);
5. Short and easy set-up for diameter change;
6. Higher performance due to improved drive technology;
7. The main control panel uses touch-screen technology, the screen clearly displays all current machine data, menus for adjustment and operation;
8. The machine is designed for heavy-duty and continuous working;
9. Working in sitting position possible, this guarantees longer working without fatigue;
10. Calendar hanger tool can be required for producing calendars.

#### Specifications:

Binding width	Max.520 mm, min.75mm
Max binding thickness	23 mm
Binding capacity:	up to 1000 calendars/h
Calendar tool	optional
Paper feed	Horizontal/manual
Insertion	automatic
Closing	automatic
Pitch	3:1 and 2:1
Possible wire diameters	3/16" to 1"
Time for diameter change	30min
Compressed air	6-8 bar , 0.16 m2/min
Machine dimension	800 x 1230 x 1320 mm
Power	220v,50hz,1ph,1.5kw
N.W./G.W.	250kqs / 300kqs
Required space	3.3 m2

CE CERTIFICATE,12 MONTH QUALITY WARRANTY, LIFETIME REPAIR
